

CASE STUDY

IMAGINE | CREATE | DISPLAY

CLIENT:
Federation of Small Business

SCOPE OF WORK:
Supply of stage backdrop.

SYSTEM SPECIFICATIONS:
2.5m high x 3m wall

PROJECT OVERVIEW:

The client was looking for a stage backdrop that could be built quickly and was capable of being carried by one person. This was for FSB's Business awards and would be put up and pulled down multiple times throughout a tour of the UK.

As it was the video company for the awards ceremony who was purchasing the stand on behalf of FSB it was critical the material on the TRIGA® Max wall did not reflect any light which would have created massive post production editing challenges.

BENEFITS:

Lightweight and portable, TRIGA® Max was the preferred product. The textile graphics also posed no reflection issues.
